X-TRAIL

PERFORMANCE FOR EVERY ADVENTURE.

X-TRAIL combines high efficiency with bold performance. Designed for effortless driving, the advanced engine and virtually gearless Xtronic CVT work seamlessly together for a thrilling ride. The choice of advanced gasoline or diesel engines is yours, with both delivering responsive power and outstanding fuel economy. With X-TRAIL, you're all set for any adventure.

Active Engine Braking. Whether you're slowing for a corner or coming to a stop, this system uses the Xtronic transmission to apply engine braking – much like shifting to a lower gear in traditional transmissions – to help give smoother deceleration and a more confident feel when braking.

Active Trace Control. A turn for the better, this innovative technology helps improve control when you take a corner. It reads the cornering situation and, if needed, can brake each wheel individually to help you steer through the turn with confidence.

Active Ride Control. Fear no bump. With Active Ride Control, X-TRAIL can automatically apply braking and adjust engine torque after you hit a bump to smooth out your ride.

Active Brake Limited Slip (ABLS). To help provide better grip in slippery conditions, ABLS can apply braking to an individual wheel when it starts to spin.

Hill Start Assist (HSA). Up, up, and smoothly away. HSA helps prevent rollback when starting on an incline.
