NISSAN INTELLIGENT AROUND VIEW MONITOR
WITH NEW MICRA AS YOUR PARTNER, EVEN PARKING IS A PLEASURE

What if parallel parking was easier? A rearview camera is great when backing up – but when it comes to parking, it’s nice to see more than just what’s directly behind you. That’s why NEW MICRA’s Class-Exclusive Around-View Monitor, uses four cameras that give you a virtual 360º bird’s-eye view of your vehicle, with selectable split-screen close-ups of the front, rear, and curbside views, so you can get a better look. And since all obstacles aren’t stationary (shopping trolleys, we’re talking to you), Moving Object Detection helps keep an eye around your NEW MICRA, and can warn you about moving objects detected in your vicinity.

RIGHT ON THE NOSE.
In Drive, the display gives you both a front and overhead view, so you know just how far to pull up – without going too far.

COMPLETE THE PICTURE.
Located under your driver’s side mirror, this camera helps round out your virtual 360º bird’s-eye view, whether you’re in Drive or Reverse.

RIGHT ON YOUR WHEELS.
In Drive or Reverse, you can push the camera button to switch out the overhead for a side view. A great help for seeing how close you are to the curb.

BACKGROUND SAVVY.
In Reverse, the display helps you see what’s directly behind you, while the overhead view helps with smaller objects that might be hidden below your window.
